

The Cambridge Group

We have used D-Tech Consulting as our sole provider of Network Services and Hardware since 2001. Every call has been completed with prompt, friendly and high-quality service. All our equipment from workstations, servers, laptops and printers, have shown to be high quality at an affordable price. Their guidance and work ethic have made our company much more efficient. D-Tech always takes the time and care to provide solutions we need, at a budget we can manage.

We now have 6 remote locations spanning Ontario and Quebec with over 150 computers on one centralized network, which resulted in less administrative and redundant costs, thereby saving our company hundred of thousands of dollars every year. Our downtime had been minimal and productivity within the company had risen tremendously. D-Tech has proven to be capable of managing a variety of projects, no matter how small or large. Their commitment is second to none, as is their rapid response time when issues or questions arise.

We would gladly recommend D-Tech Consulting for any company that is seeking unparalleled service and knowledge when looking for optimum solutions for their IT needs. They have the skills, experience and friendly service to make your computer environment the best it can be, while maintaining a reasonable budget.

Sincerely,

Jonah Arnold
I.T. Director
